

KENNY DEE A. AMORGIENTE

+63 928 704 6414 | kennydee.amorgiente@foundationu.com | Basay, Negros Oriental, Philippines

PROFESSIONAL SUMMARY

IT graduate with a strong focus on building clean, fast, and easy-to-use software. Experienced in creating both frontend designs and backend logic using tools like Node.js, React, and MySQL. Passionate about modern, minimalist design and using AI tools to speed up coding workflows and keep project quality high.

TECHNICAL SKILLS

Frontend: React, JavaScript, TypeScript, jQuery, AJAX, HTML5, CSS3, Bootstrap

Backend: Node.js, PHP, CodeIgniter4, REST APIs, API Integration

Database: MySQL, PostgreSQL, Vector Embeddings

Design: Modern Minimalist UI, Bento Grid Layouts, Fintech Aesthetic

Tools & Concepts: Git, OAuth 2.0, Gmail API, System Design, Figma, Fundamentals of Networking, WordPress

AI Tool Proficiency: Codex, ChatGPT — prompt engineering, workflow automation

PROJECTS & SOFTWARE DEVELOPMENT

Web Developer | *FUSOMS – Organization Management System (University Project) 2026*

- Implemented a complex 6-tier Role-Based Access Control hierarchy for cross-departmental approvals.
- Designed a modern UI with custom themes, dark mode support, and advanced notification logic.
- Developed high-efficiency form layouts and AJAX-based notification systems with localStorage persistence.
- Ensured real-time status synchronization across all interfaces using React.

Web Developer (Admin Side) | *TapPark – Parking Management System (Capstone) 2025-2026*

- Developed a parking management system with separate Admin and User interfaces.
- Contributed front-end interactions using jQuery, HTML, and CSS; supported back-end MySQL database operations.
- Prepared system documentation and assisted in requirements gathering and stakeholder interviews.

WORK EXPERIENCE

Full-Stack Developer (IT Intern / OJT) | *PacBiz Ticketing System 2026*

- Developed a full-stack ticketing platform with a 3-tier Role-Based Access Control (Admin, Technician, Requester) to organize IT support tasks.
- Integrated AI using Ollama and OpenAI to automatically sort tickets, set priority levels, and filter out spam emails.
- Built an automated email-to-ticket system using Gmail OAuth and webhooks, including an AI guard to validate incoming data.
- Created auto-assignment logic that checks technician shifts and tracks SLA compliance to ensure balanced workloads.
- Developed real-time dashboards and wallboards using WebSockets for live monitoring of ticket queues and system health.

Part-Time Full-Stack Developer | *PasokPay – HR & Payroll System 2026*

- Built a full-stack HR and payroll system with secure portals for Administrators and Employees.
- Created an attendance engine for live clock-ins, break tracking, and automatic overtime calculations using real-time UI polling.
- Designed a payroll calculator that automatically computes net pay based on daily rates, attendance logs, and bonuses or penalties.
- Built a revolving fund system that automatically deducts food, gas, and cash advances from final payslips.

- Integrated a payment sandbox using Supabase Edge Functions to test automated salary payouts through Xendit and GCash.
- Developed admin reporting tools to monitor workforce metrics and export payroll data to CSV.

EDUCATION

Bachelor of Science in Information Technology | *Foundation University, Dumaguete City* 2022 – 2026
Graduated Cum Laude

Senior High School | *Saint Augustine Academy of Bayawan Incorporated* 2019 – 2021
Graduated With Honors

AWARDS & RECOGNITION

- Graduated Cum Laude, Batch 2026
- Dean's Lister — Consistent Academic Excellence (2023 – 2026)
- Special Recognition Award — Excellence in design and implementation of the FUSOMS platform
- Graduated With Honors (Senior High School)

CERTIFICATIONS & ADDITIONAL TRAINING

Cisco Networking Academy

- IT Essentials — Course Certificate (Mar 25, 2025)
- Cyber Threat Management — Course Certificate (Mar 25, 2025)
- Introduction to Cybersecurity — Course Certificate (Dec 08, 2024)

Other

- PayMaya Sandbox Integration — Built admin panels for payment gateway API integration using CodeIgniter and MySQL.
- Fundamentals of Networking & WordPress — Trained in core infrastructure and CMS platforms.
